

Decoupling

A BAD BET FOR FLORIDA

Florida is known as “The Horse Capital of the World.”

Our billion-dollar horse racing industry employs more than 12,000 statewide.

Voters approved “racinos” to help Florida compete against other states using slot revenue to take away our business.

Live racing days are horse racing investors’ return on investment.

Live racing days promote investment in Florida green space and agriculture.

Using slot machine revenue to KEEP horse racing and breeding business in Florida is a smarter solution than spending taxpayer funds in hopes that jobs MAY come.

- Decoupling tells horse racing investors that Florida is “closed for business.”
- Decoupling equals immediate gambling expansion.
- Decoupling makes sure that money gambled in casinos, stays with casinos.

The purpose of Florida gambling should be to create jobs, revenue and economic impact--NOT to ensure optimal casino profits.

When it comes to horse racing,

FLORIDA CAN'T AFFORD DECOUPLING!
